

Clinical Field Specialist

Artiria Medical SA is a start-up company active in the field of neurovascular technology. Artiria's objective is to establish a new standard of care to fight stroke and save lives. 12 million people suffer a stroke every year. This brain pathology often leads to severe disabilities and death. Artiria develops a cutting-edge medical devices using the patient's arteries as an access route to smoothly reach the brain and locally deliver life-saving treatments.

Artiria Medical is looking for a talented **Clinical Field Specialist** to contribute to the clinical development of the company

KEY TASKS AND RESPONSIBILITIES

- Support clinical activities at hospitals in your region and abroad, ensuring smooth execution of neurovascular procedures and study protocols.
- Provide technical and clinical support during neurovascular interventions.
- Provide feedback to the rest of the team regarding potential improvements or new therapy developments.
- Provide hands-on technical training for physicians and staff before, during and post-operative procedures.
- Provide real-time support in the operating room (OR) and during after-hours calls as needed.
- Offer feedback and guidance to physicians and medical teams on the use of devices inside and outside of the OR.
- Build and maintain strong, trust-based relationships with healthcare professionals and key opinion leaders (KOLs).
- Collaborate with clinical and regulatory teams to ensure accurate data collection and compliance with Good Clinical Practice (GCP) standards.
- Coordinate with external vendors like Contract Research Organizations (CROs) to ensure study protocol adherence and timely reporting of data.
- Ensure compliance with U.S. Food and Drug Administration (FDA), EU MDR regulations and other regulatory standards.
- Report device-related quality issues and document key compliance actions

QUALIFICATIONS

- Bachelor's degree or technical certification in a related healthcare field (advanced degrees are a plus).
- At least 3 years of experience in clinical support activities, ideally in neurovascular or other implantable medical devices.
- Experience working in OR environments and providing case support.
- Experience working with clinical research studies and GCP standards.
- Strong communication and interpersonal skills, with the ability to interact with a wide range of healthcare professionals.
- Ability to adapt to a fast-paced environment and manage multiple tasks under deadlines.
- Flexibility to work on an unpredictable schedule, with the ability to travel up to 75%.
- Must have the highest personal values and ethical standards
- Must have a results-oriented work ethic and a positive, can-do attitude.
- Ability and strong desire to "make things happen"
- Strong commitment to work in a Startup environment
- Good team player
- Languages:** English and French, written and spoken
